**Subject:** satisfied customer

Bruce and the nice folks at CG-Lock,

Just wanted to let you know that I am a very satisfied customer!

Last Saturday, my Mini Cooper S was rear-ended by a Chrysler 300. I was doing about 60, he was around 100. I got not only a big push, but also some rotational velocity from the impact.

My CG-Lock was in use and tight like I always wear it which was fortunate because I credit it with helping to save my life! Because I was firmly attached to the seat, I was able to control the car through some very serious and aggressive post-collision maneuvering.

Thanks for a really great product!

Tony (last name and address deleted)

P.S. Should my CG-Lock be replaced after an accident of this magnitude? (**The impact broke the seat.**) Should I ask that the seat belts be replaced also?  
Thanks.
