

Single pass

The diagram shows a black rectangular seatbelt tongue with a single horizontal slot on its top surface. A blue line representing the seatbelt strap passes through this slot from left to right.

Double pass

The diagram shows a black rectangular seatbelt tongue with a horizontal slot on its top surface and a vertical notch on its right side. A blue line representing the seatbelt strap passes through the slot from left to right, then loops back up and over the notch.

Double pass

The diagram shows a black rectangular seatbelt tongue with a horizontal slot on its top surface. A blue line representing the seatbelt strap passes through the slot from left to right, then loops back up and over the top of the tongue.

The CG-Lock does not fit all vehicle seatbelts. The CG-Lock will not fit most cars with double pass tongues (see left) or cars with automatic seat belts or cars with a retractor reel on the lap belt
